

CATALOGUE

of our products

Ladder Type Cable Tray

Rugged and high-load-bearing cable trays with superior ventilation, ideal for industrial and commercial applications. Available in Pre-GI, Hot-Dip GI, MS, SS, Aluminum, Powder-Coated, Painted, and FRP.

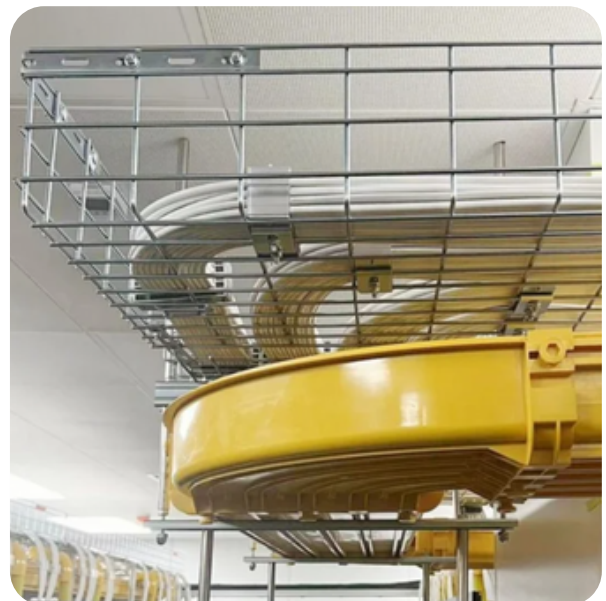

Perforated Type Cable Tray

Versatile cable management solution with precision perforations for efficient heat dissipation and airflow. Available in multiple finishes for durability and corrosion resistance.

Raceway Type Cable Tray

Enclosed system ensuring safe and organized routing of power and data cables. Perfect for commercial and IT infrastructure.

Wire mesh Cable Trays

Lightweight yet sturdy tray offering maximum flexibility and airflow. Ideal for data centers and sensitive cable management.

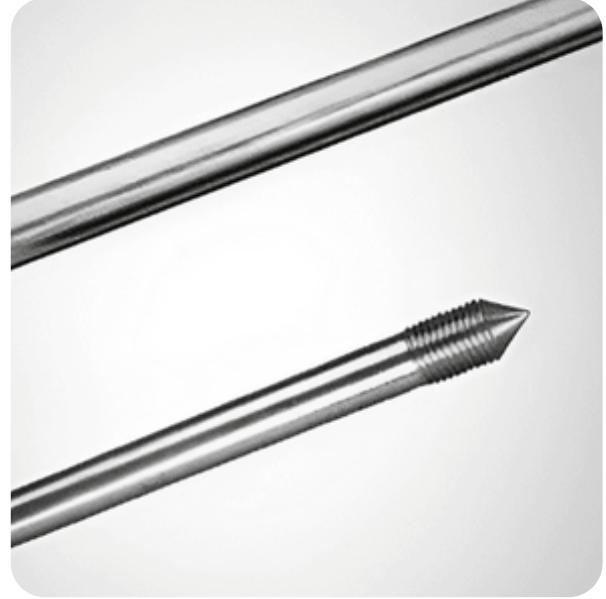

CATALOGUE

of our products

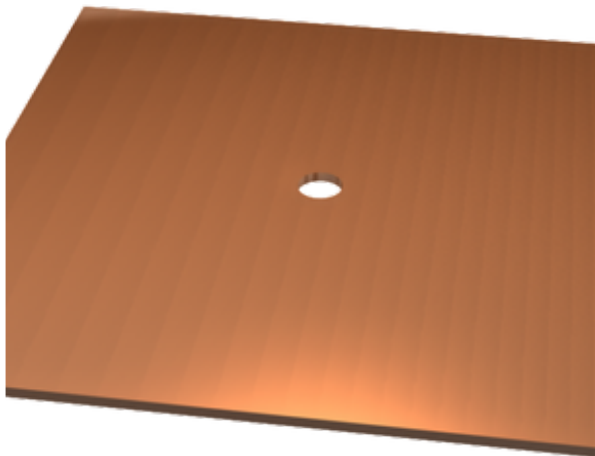

Earthing Strips

Flat metal strips used for efficient grounding in electrical systems, ensuring safety and protection against electrical faults. Available in GI, MS, SS, Copper, and Aluminum.

Earthing Rods

Rods used for deep grounding applications, enhancing system stability. Available in GI, Copper Bonded, & Solid Copper.

Earthing Plates

Sturdy metal plates providing a large surface area for effective dissipation of fault currents into the ground. Available in GI, MS, SS, and Copper.

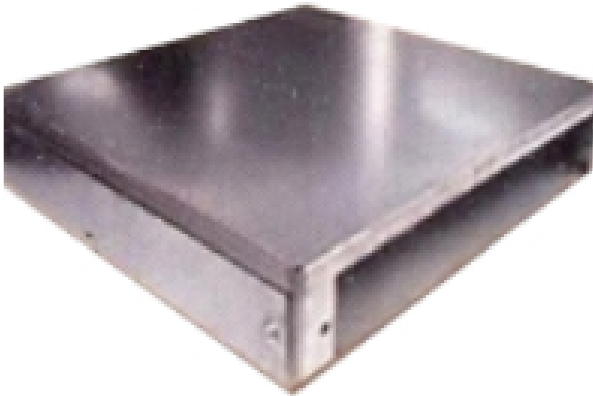

Earthing Electrodes

Advanced grounding solution with enhanced conductivity and longer life, used for industrial, commercial, and residential applications. Available in GI and Copper Bonded.

CATALOGUE

of our products

Junction Box

Available in GI, MS, SS, Aluminium and FRP materials.

Couplers

Durable and high-strength couplers ensuring reliable connectivity in electrical and instrumentation systems.

Cable Glands

Precision-engineered glands for securing and protecting cables from moisture, dust, and mechanical stress.

Cable Tray Cover

Robust support accessories for secure and organized cable routing in industrial applications.

CATALOGUE

of our products

Male Connector

Our Male Connector is designed for secure and reliable connections in cable management systems. Made from high-quality materials, it ensures a sturdy and long-lasting connection.

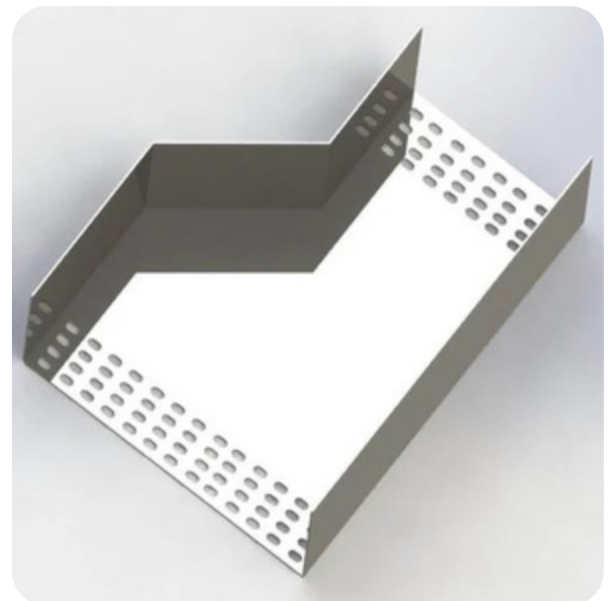

Reducer - Center

Our Reducer-Center is designed to provide a secure and efficient way to reduce cable sizes in cable management systems.

Reducer - Right

90-degree right-hand turn cable reducer for secure and efficient cable management, reducing cable size for neater organization.

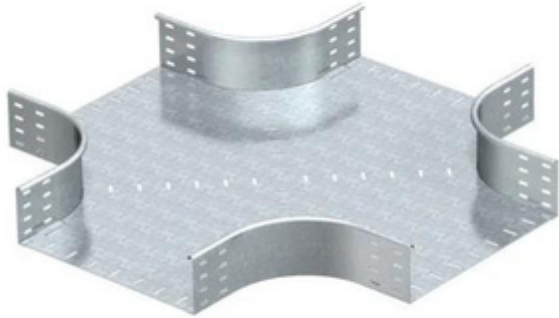

Reducer - Left

90-degree left-hand turn cable reducer for flexible cable routing, reducing cable size for streamlined cable management.

CATALOGUE

of our products

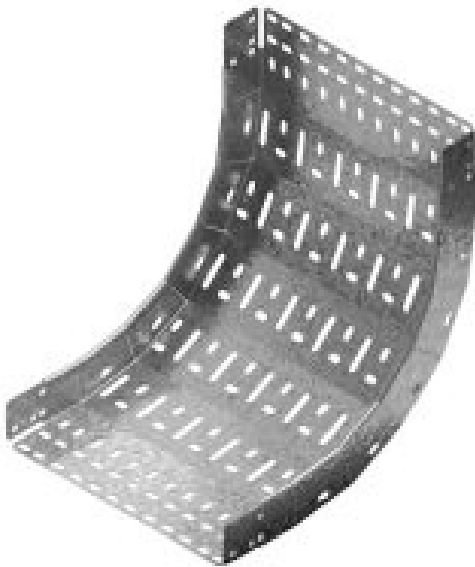

Horizontal Cross

Four-way cable management cross connector for organizing and separating cables, providing a tidy and efficient cable management solution.

Horizontal Bend

90-degree horizontal cable bend for changing cable direction, providing a secure and efficient way to manage cables.

Inner Riser

Cable riser for internal applications, allowing cables to be routed vertically within enclosures or panels.

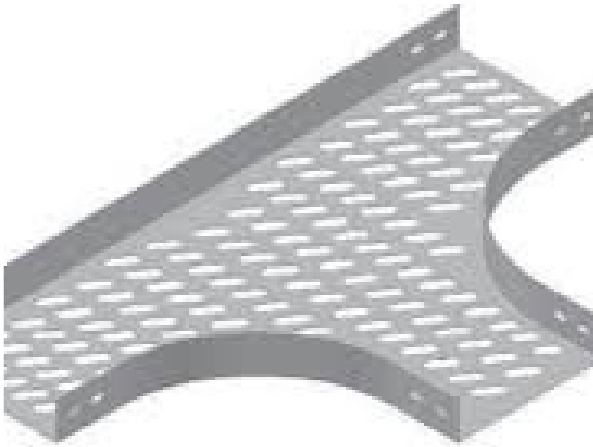

Outer Riser

Cable riser for external applications, enabling cables to be routed vertically up or down, ideal for surface-mounted installations.

CATALOGUE

of our products

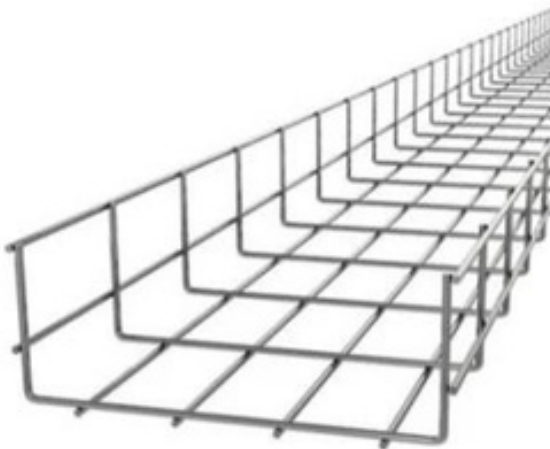

Tee Bend

90-degree tee-shaped cable bend for connecting three cables, providing a secure and efficient way to manage cable intersections.

Light Duty Wire Mesh Tray

Versatile and lightweight cable management solution for organizing and supporting cables, suitable for light-duty applications.

Medium Duty Wire Mesh Tray

Robust and versatile cable management solution for organizing and supporting cables, suitable for medium-duty applications, offering a balance between strength and flexibility.

Heavy Duty Wire Mesh Tray

Ultra-sturdy and rugged cable management solution for demanding applications, designed to support heavy cable loads and withstand harsh environments, ensuring reliable and secure cable organization.

CATALOGUE

of our products

3-piece Union

Securely connects three cables or pipes, enabling easy disconnection and reconnection.

Bushing

Provides protective insulation and support for cables and pipes, ensuring reliable performance.

2 CPL Manifold

Compact and durable manifold designed for precise control in industrial applications.

2 DM 1 Manifold

Dual-isolation manifold ensuring reliable pressure measurement and control.

CATALOGUE

of our products

2 FL 1 Manifold

High-performance flange-type manifold for secure fluid regulation.

2 GIV

General inline valve for efficient flow control in instrumentation systems.

2 MNV Manifold

Mini needle valve manifold offering precise flow regulation.

2 PTM 1 Manifold

Single-port pressure transmitter manifold for safe and accurate pressure monitoring.

CATALOGUE

of our products

2 PTM 2 Manifold

Dual-port transmitter manifold for enhanced pressure measurement applications.

2 PTM 4 Manifold

Four-port pressure transmitter manifold for multi-line pressure control.

2 PTM 5 Manifold

Five-port pressure transmitter manifold ensuring maximum measurement flexibility.

3 DM 1 Manifold

Three-valve differential pressure manifold for safe and efficient pressure isolation.

CATALOGUE

of our products

3 DM 2 Manifold

Advanced three-valve manifold for precise differential pressure control.

3 DM 5 Manifold

Heavy-duty three-valve manifold for high-pressure applications.

3 HM 1 Manifold

High-pressure manifold engineered for demanding industrial environments.

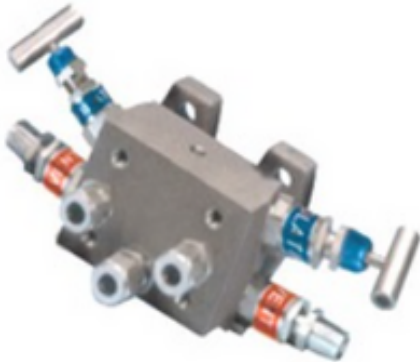

3 TM 1 Manifold

Three-way manifold for streamlined pressure measurement and isolation.

CATALOGUE

of our products

4 DM 1 Manifold

Four-valve differential manifold for precise and leak-proof pressure control.

5 CPL 1 Manifold

Five-port compact manifold designed for complex flow regulation.

5 DM 1 Manifold

High-performance five-valve manifold for secure pressure control.

5 HM 1 Manifold

Five-valve high-pressure manifold for industrial-grade fluid management.

CATALOGUE

of our products

5 RM 3 Manifold

Rugged manifold for robust flow control in extreme conditions.

5b TM 1 Manifold

Specialized five-way manifold for critical instrumentation setups.
